EXPERIENCE

● Omnibound, U.S.A — Aws DevOps&Security Engineer

04/2025 - Present

- Designed and managed CI/CD pipelines using Jenkins, Git, Docker, and ArgoCD for deployments on AWS EKS and EC2, supporting AI/ML application workloads with secure delivery via Cloudflare CDN and WAF.
- Implemented **SOC 2 compliance controls** by integrating GitGuardian, ScoutSuite, OWASP ZAP, Sentry, Snyk, SonarQube, and AWS services (CloudTrail, GuardDuty, Security Hub, CloudWatch, Amazon Inspector) for vulnerability scanning and continuous security monitoring.
- Integrated and managed **Aurora PostgreSQL** for application workloads and **Pinecone vector database** for AI semantic search use cases, ensuring performance and reliability.
- Led a **team of engineers** in website development and cloud infrastructure management using AWS services (EC2, S3, RDS, SQS), driving delivery of scalable and secure solutions.
- Strengthened **system security and observability** by implementing IAM best practices, VPC design, WAF, and monitoring stacks (CloudWatch, ELK).

● Omnineura AI Technologies, Bangalore — Azure DevOps Engineer— 02/2023 - 01/2025

- Hands-on experience with Azure DevOps (Azure Repos & Pipelines) to build and manage CI/CD pipelines for microservices-based applications, enabling automated and reliable deployments.
- Strong experience in deploying and managing applications using Azure **App Services** and Azure Kubernetes Service (**AKS**) with Docker and Azure Container Registry (**ACR**).
- Worked with core Azure services including **Azure Blob Storage** (static frontend hosting with CDN), Azure networking, and Azure **RBAC** to support secure, scalable cloud deployments.

EDUCATION

KITS, Warangal— *B.Tech Electrical&Electronics Engineering*— 08/2019 - 04/2023
Percentage - 71.6
